

Working with the Human Aura

Presented by Rev. Simeon Stefanidakis

The Human Aura is the energy field which surrounds all living beings. Within the aura is imprinted the character of the individual on the physical, emotional, mental and spiritual levels. To the trained clairvoyant, a tremendous amount of information can be perceived within the aura, not only about present conditions, but past and the potential for the future.

This Saturday seminar will examine the human aura and its various energy layers and levels. Students will be shown how to perceive and feel the aura and how to work with the aura for healing. There will also be an opportunity to do aura drawings.
